SUMMARY OF THE INDUSTRY IN WHICH OUR COMPANY OPERATES

The Indian animal feed industry is a dynamic and growing sector, driven by the increasing demand for agricultural products, as well as the expansion of commercial livestock production. In 2023, the market was valued at INR 1,035.2 billion and is expected to grow at a compound annual growth rate (CAGR) of 7.2% from 2024 to 2032 ([IMARC](#)) ([IMARC](#)).

Challenges

The industry faces several challenges, including:

- **Raw Material Prices:** Volatility in prices of key ingredients like fertilizer. The ban on genetically modified soybeans and maize further complicates raw material procurement ([India Business Trade](#)).
- **Price Sensitivity:** Animal feed prices are closely tied to the prices of end products like milk, meat, and eggs. Discrepancies between these prices can strain profitability ([India Business Trade](#)).

Innovations and Trends

Innovations such as the use of by-products from ethanol production (e.g., DDGS) in feed are helping to mitigate some raw material challenges. However, awareness and adoption of these alternatives need to improve ([India Business Trade](#)).

Export and Trade

India's animal feed export market is also significant, with key markets including Bangladesh, Vietnam, and China. In 2022-23, India's cattle feed exports reached \$2.5 billion, highlighting the country's growing influence in the global feed market ([India Business Trade](#)).

According to Inc42, the Indian agricultural sector is predicted to increase to US\$ 24 billion by 2025. Indian food and grocery market is the world's sixth largest, with retail contributing 70% of the sales. As per First Advance Estimates for FY 2022-23 (Kharif only), total foodgrain production in the country is estimated at 149.92 million tonnes. Rapid population expansion in India is the main factor driving the industry. The rising income levels in rural and urban areas, which have contributed to an increase in the demand for agricultural products across the nation, provide additional support for this. In accordance with this, the market is being stimulated by the growing adoption of cutting-edge techniques including blockchain, artificial intelligence (AI), geographic information systems (GIS), drones, and remote sensing technologies, as well as the release of various e-farming applications.

For further detailed information, please refer to chapter titled “**Industry Overview**” on page no. **51** of this Letter of Offer.

In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of this issue including the merits and risks involved. Any potential investor in, and subscriber of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment in which some material respects may be different from that which prevails in other countries. Additional risks and uncertainties, not currently known to us or that we currently do not deem material may also adversely affect our business, results of operations, cash flows and financial condition. If any of the following risks, or other risks that are not currently known or are not currently deemed material, actually occur, our business, results of operations, cash flows and financial condition could be adversely affected, the price of our Equity Shares could decline, and investors may lose all or part of their investment.

Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein. - *Some risks may have material impact qualitatively instead of quantitatively;*
- *Some risks may not be material at present but may have material impact in future.*

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence the same has not been disclosed in such risk factors. Unless otherwise stated, the financial information of our Company used in this section is derived from our Financial Information prepared in accordance with IND AS and the Companies Act. Unless otherwise stated, we are not in a position to specify or quantify the financial or other risks mentioned herein. For capitalized terms used but not defined in this chapter, refer to the chapter titled “Definitions and Abbreviations” on page no.1 of this Letter of Offer. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

The Letter of Offer also contains forward looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of many factors, including the considerations described below and elsewhere in the Letter of Offer.

3. We require certain approvals and licenses in the ordinary course of business, and the failure to obtain or retain them in a timely manner may materially affect our operations.

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, whenever it expires.

While we have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities. There can be no assurance that the relevant authority will issue an approval or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations. These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty.

4. *The part of Registered Office and Corporate Office of our Company is not owned by us.*

We operate from our registered office situated at A-505, Titanium City Centre, Near Sachin Tower, 100 Feet Ring Road, Anandnagar, Satellite, Jodhpur Char Rasta, Ahmedabad, Gujarat, India, 380015 which is partly owned by us and part of the same has been taken on lease to use the place as registered office vide lease and license Agreement. Any discontinuance of such arrangement will lead us to locate any other premises. Our inability to identify the new premises may adversely affect the operations, finances and profitability of our Company.

5. *The price, at which we are trade depend largely on prevailing market prices. Increase in costs of our raw materials could have a material adverse effect on our Company's sales, profitability and results of operations.*

Our Company is dependent on third party suppliers for procuring goods for trading. We are exposed to fluctuations in the prices of the goods as well as its unavailability, particularly as we typically do not enter into any long-term supply agreements with our suppliers and our major requirement is met in the spot market. We may be unable to control the factors affecting the price at which we procure the materials. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Upward fluctuations in the prices of raw material may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial condition and results of operations. Though we enjoy favourable terms from the suppliers both in prices as well as in supplies, our inability to obtain high quality materials in a timely and cost-effective manner would cause delays in our production and delivery schedules, which may result in the loss of our customers and revenues.

6. *Our business is subject to seasonal volatility, which may contribute to fluctuations in our results of operations and financial condition.*

Due to the seasonal availability of these agriculture products, our business is seasonal in nature. The period during which our business may experience higher revenues varies from season to season depending upon the availability and thereafter harvesting of this raw material. During the crop season, we are able to procure these raw materials at reasonable terms and in substantial quantities, whereas during the off-season their availability is less and also there are price variations. Accordingly, our revenue in one quarter may not accurately reflect the revenue trend for the whole Financial Year. The seasonality of Cotton Seeds and its impacts may cause fluctuations in our result of operations and financial conditions.

7. *Our Company requires significant amounts of working capital for a continued growth. Our inability to meet our working capital requirement may have an adverse on our results of operations.*

Our business is working capital intensive and involves a lot of investment in working capital. All these factors may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of funds in a timely manner, or at all, to meet the requirement of working capital or payout debts, could adversely affect our financial condition and result of our operation.

8. *We have delayed in regulatory filings to be made with the ROC.*

There are some instances where forms have been belated filed with ROC with requisite additional fees. Although, no show cause notice have been issued against our Company till date in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected. Also with the expansion of our operations there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

9. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.*

Our future ability to pay dividends will depend on our future earnings, financial condition and capital requirements. Dividends may be distributed by us will attract dividend distribution tax at rates applicable from time to time. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations.

10. *Our actual results could differ from the estimates and projections used to prepare our financial statements.*

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and/ or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

11. *Any defects in our products could make our Company liable for customer claims, which in turn could affect our Company's results of operations.*

Our Company is bound by the terms and conditions as stated in the purchase order placed by its customers. There are no specific regulations governing the supply of the same, other than the general law of contracts. Any claims made by these customers for defects in the products, would be subject to these terms and conditions, which are in the nature of normal contractual obligations in India. Any violation of these obligations could impact our Company's results of operations and financial conditions.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting for external purposes, including with respect to record keeping and transaction authorization. Because of our inherent limitations, internal control over financial reporting is not intended to provide absolute assurance that a misstatement of our financial statements would be prevented or detected. Any failure to maintain an effective system of internal control over financial reporting could limit our ability to report its financial results accurately and in a timely manner, or to detect and prevent fraud.

Although we have put in place strict quality control procedures, we cannot assure that our products will always be able to satisfy our customers' quality standards. Any negative publicity regarding our Company, or products, including those arising from any deterioration in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation, our operations and our results from operations.

16. *We do not have any long-term agreement or contract for supply of goods & consequently are exposed to price and supply fluctuations for our raw materials.*

Consequently, we are exposed to price and supply fluctuations in raw materials, and these fluctuations may adversely affect our ability to obtain orders and/ or to execute them in a timely manner, which would have a material adverse effect on our business, results of operations and financial condition.

In case of non-availability of goods on favourable terms we may have to procure the same at the terms and conditions prevalent at that point. This will result in reducing our revenues by a considerable amount due to shortage of raw material or due to inability to procure the same. Further, unfavourable terms of raw materials may also force us to reduce the scale of our operations resulting in a down-sizing of our overall business. We may have to put on hold any expansion plans and our business will be adversely affected.

17. *Our success depends heavily upon our Directors and Key Managerial Personnel for their continuing services, strategic guidance and financial support. Our success depends heavily upon the continuing services of Promoters, Directors and Key Managerial Personnel who are the natural person in control of our Company.*

Our Directors have a vast experience in the business undertaken by our Company. They have established cordial relations with various customers and suppliers over the past several years, which have immensely benefitted our Company's current customer and supplier relations. We believe, our Directors, who have rich experience in this industry, managing customers and handling overall businesses, has enabled us to experience growth and profitability.

We benefit from our relationship with our Directors and Key Managerial Personnels and our success depends upon their continuing services. We also depend significantly on our Directors and Key Managerial Personnels for executing our day-to-day activities. The loss of any of Directors and Key Managerial Personnels, or failure to retain, recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may

be unable to execute our growth strategy. For further details of our Directors and Key Managerial Personnels, please refer to the chapter titled "***Our Management***" on page no. 73 of this Letter of Offer.

Although we have put in place strict quality control procedures, we cannot assure that our products will always be able to satisfy our customer's quality standards.

B. EXTERNAL RISK FACTORS:

1. The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.

The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in Letter of Offer, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian Company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on Director(s) and Key Managerial Personnel(s) from engaging in forward dealing. Further, Companies meeting certain financial thresholds are also required to constitute a committee of the Board of Directors for corporate social responsibility activities and ensure that at least 2% of the average net profits of the Company during three immediately preceding financial years are utilized for corporate social responsibility activities. Penalties for instances of non-compliance have been prescribed under the Companies Act, 2013, which may result in inter alia, our Company, Director(s) and Key Managerial Personnel(s) being subject to such penalties and formal actions as prescribed under the Companies Act, 2013, should we not be able to comply with the provisions of the New Companies Act within the prescribed timelines, and this could also affect our reputation.

To ensure compliance with the requirements of the Companies Act, 2013 within the prescribed timelines, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. While we shall endeavour to comply with the prescribed framework and procedures, we may not be in a position to do so in a timely manner.

2. Political, economic, or other factors that are beyond our control may have adversely affect our business and results of operations.

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition, and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance.

We are dependent on domestic, regional, and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional, and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, and volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

3. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects, and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

4. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have

implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance, and the trading price of the Equity Shares.

5. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GOI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

6. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

7. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other/ adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

8. *Any further downgrading of our debt ratings or of India's sovereign debt rating may adversely affect our business.*

Any downgrading of our credit ratings may increase interest rates on our outstanding debt, increase interest rates for refinancing our outstanding debt, which would increase our financing costs, and materially and adversely affect our ability to raise new capital on a competitive basis, which may adversely affect our profitability and future growth. In addition, any adverse revisions to India's

credit ratings for domestic and international debt by international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available. This may materially and adversely affect our capital expenditure plans, business and future financial performance and our ability to fund our growth in future.

9. *The ability of Indian companies to raise foreign capital may be constrained by Indian law.*

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

10. *A slowdown in economic growth in India could cause our business to suffer.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- i. any increase in Indian interest rates or inflation;
- ii. any scarcity of credit or other financing in India;
- iii. prevailing income conditions among Indian consumers and Indian corporations;
- iv. changes in India's tax, trade, fiscal or monetary policies;
- v. political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- vi. prevailing regional or global economic conditions; and
- vii. other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

11. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

12. *Natural calamities could have a negative impact on the Indian economy and cause our*

Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

C. RISK FACTORS RELATED TO ISSUE:

1. *Our Company will not distribute this Letter of Offer, the Abridged Letter of Offer and Application Form to overseas Shareholders who have not provided an address in India for service of documents.*

Our Company will dispatch this, the Abridged Letter of Offer, Rights Entitlement Letter and Application Form (the “**Issuing Materials**”) to such Eligible Shareholders as on Record Date to be determined by the Board of Directors whose email address are not available in record of the Depositories. The Issuing Materials shall not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions.

2. *The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholder”) may lapse in case they fail to furnish the details of their demat account to the Registrar.*

Please note that in accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circulars, the credit of Rights Entitlements and Allotment of Equity Shares shall be made in dematerialized form only. Accordingly, Eligible Equity Shareholders holding Equity Shares in physical form as on Record Date i.e. **28th March, 2025** and desirous of subscribing to Equity Shares in this Issue are advised to furnish the details of their demat account to the Registrar to the Issue or our Company in the manner provided on the website of the Registrar to the Issue at www.skylinerta.com at least two working days prior to the Issue Closing Date i.e. **25th April, 2025**, to enable the credit of their Rights Entitlements in their respective demat accounts at least one day before the Issue Closing Date i.e. **29th April, 2025**. They may also communicate with the Registrar with the help of the helpline number [011-40450193](tel:011-40450193) and their email address at ipo@skylinerta.com.

Prior to the Issue Opening Date, the Rights Entitlements of those Eligible Equity Shareholders, among others, who hold Equity Shares in physical form, and whose demat account details are not available with our Company or the Registrar to the Issue, shall be credited in a demat suspense escrow account opened by our Company.

In accordance with the SEBI Rights Issue Circulars, the Eligible Equity Shareholders, who hold Equity Shares in physical form as on Record Date and who have not furnished the details of their demat account to the Registrar or our Company at least two working days prior to the Issue Closing Date, i.e. **25th April, 2025**, desirous of subscribing to Rights Equity Shares may also apply in this Issue during the Issue Period. Such Eligible Equity Shareholders must check the procedure for Application by and credit of Rights Equity Shares in **Section Terms of the Issue - “Procedure for Application by Eligible Equity Shareholders holding Equity Shares in physical form” and “Credit and Transfer of Rights Equity Shares in case of Shareholders holding Equity Shares in Physical Form and disposal of Rights Equity Shares for non-receipt of demat account details in a timely manner” on page nos. 150 and 167 respectively of this Letter of Offer.**

3. ***Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.***

Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renounees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounee will not be able to apply in this Issue with respect to such Rights Entitlements. For details, please refer to “*Terms of the Issue*” on page no. 144 of this Letter of Offer.

4. ***You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian Company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

5. ***You may not receive the Equity Shares that you subscribe to in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.***

The Equity Shares that you subscribe to in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

6. ***There is no guarantee that our Equity Shares will be listed in a timely manner or at all, which may adversely affect the trading price of our Equity Shares.***

In accordance with Indian law and practice, approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

7. ***No market for the Rights Entitlements may develop and the price of the Rights Entitlements may be volatile.***

No assurance can be given that an active trading market for the Rights Entitlements will develop on the Stock Exchanges during the Renunciation Period or that there will be sufficient liquidity in Rights Entitlements trading during this period. The trading price of the Rights will not only depend on supply and demand for the Rights Entitlements, which may be affected by factors unrelated to the trading in the Equity Shares, but also on the Equity Share price. Factors affecting the volatility of the Share price, as described herein, may magnify the volatility of the trading price of the Rights Entitlements, and a decline in the Equity Share price will have an adverse impact on the trading price of the Rights Entitlements. The trading price of the Rights Entitlements may be subject to greater price fluctuations than that of the Equity Shares.

8. ***Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.***

In terms of the SEBI ICDR Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation or financial condition, or other events affecting the Applicant's decision to invest in our Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Rights Equity Shares at a price that will be higher than the actual market price for the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

9. ***The Rights Entitlements may not be credited into your demat account on time and you may not be able to trade such Rights Entitlements on the platform of the Stock Exchange.***

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. The Rights Entitlements that you may be entitled to may not be credited into your demat account in a timely manner. In relation to the SEBI Rights Issue circular, the Eligible Equity Shareholders can trade in such Rights Entitlements on the platform of the Stock Exchanges after the Issue Opening Date and such trading shall be closed at least three working days prior to the Issue Closing Date. We cannot assure that the Rights Entitlements allocated to you will be credited to your demat account in a timely manner or at all, which will impact your ability to trade in the Rights Entitlements.

10. ***We have evolved a mechanism for credit of the Rights Equity Shares in respect of the Eligible Equity Shareholders holding Equity Shares in physical form ("Physical Shareholder") who have not furnished the details of their demat account to the Registrar or our Company at least two working days prior to the Issue Closing Date. However, this mechanism may entail a risk that the sale of such shares by the Company on the open market subsequently may not be at a price***

acceptable to such shareholders. Further, the Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholder”) may lapse in case they fail to furnish the details of their demat account to the Registrar.

Please note that in accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circulars, the credit of Rights Entitlements and Allotment of Equity Shares shall be made in dematerialized form only. Accordingly, Eligible Equity Shareholders holding Equity Shares in physical form as on Record Date i.e. **28th March, 2025** and desirous of subscribing to Equity Shares in this Issue are advised to furnish the details of their demat account to the Registrar to the Issue or our Company in the manner provided on the website of the Registrar to the Issue at **www.skylinerta.com** at least two working days prior to the Issue Closing Date i.e. **25th April, 2025**, to enable the credit of their Rights Entitlements in their respective demat accounts at least one day before the Issue Closing Date i.e. **29th April, 2025**. They may also communicate with the Registrar with the help of the helpline number **9818456709, 011-40450193** and their email address at **ipo@skylinerta.com**.

Prior to the Issue Opening Date, the Rights Entitlements of those Eligible Equity Shareholders, among others, who hold Equity Shares in physical form, and whose demat account details are not available with our Company or the Registrar to the Issue, shall be credited in a demat suspense escrow account opened by our Company.

In accordance with the SEBI Rights Issue Circulars, the Eligible Equity Shareholders, who hold Equity Shares in physical form as on Record Date and who have not furnished the details of their demat account to the Registrar or our Company at least two working days prior to the Issue Closing Date, i.e. **25th April, 2025** desirous of subscribing to Rights Equity Shares may also apply in this Issue during the Issue Period. Such Eligible Equity Shareholders must check the procedure for Application by and credit of Rights Equity Shares in *Section Terms of the Issue - “Procedure for Application by Eligible Equity Shareholders holding Equity Shares in physical form” and “Credit and Transfer of Rights Equity Shares in case of Shareholders holding Equity Shares in Physical Form and disposal of Rights Equity Shares for non-receipt of demat account details in a timely manner”* on page nos. page *nos. 150 and 167* respectively of this Letter of Offer.

11. *Investors will be subject to market risks until our Equity Shares credited to the investor’s demat account are listed and permitted to trade.*

Investors can start trading our Equity Shares allotted to them only after they have been credited to an investor’s demat account, are listed and permitted to trade. Since our Equity Shares are currently traded on the Stock Exchanges, investors will be subject to market risk from the date they pay for our Equity Shares to the date when trading approval is granted for the same. Further, there can be no assurance that our Equity Shares allocated to an investor will be credited to the investor’s demat account or that trading in such Equity Shares will commence in a timely manner.

12. *There is no monitoring agency appointed by our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above Rs. 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations/ adverse comments of the audit committee public.

13. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a Company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

GLOBAL ECONOMIC OUTLOOK

Macro Overview of Global GDP:

Global growth is projected at 3.1 percent in 2024 and 3.2 percent in 2025, with the 2024 forecast 0.2 percentage point higher than that in the October 2023 World Economic Outlook (WEO) on account of greater-than expected resilience in the United States and several large emerging market and developing economies, as well as fiscal support in China. The forecast for 2024–25 is, however, below the historical (2000–19) average of 3.8 percent, with elevated central bank policy rates to fight inflation, a withdrawal of fiscal support amid high debt weighing on economic activity, and low underlying productivity growth. Inflation is falling faster than expected in most regions, in the midst of unwinding supply-side issues and restrictive monetary policy. Global headline inflation is expected to fall to 5.8 percent in 2024 and to 4.4 percent in 2025, with the 2025 forecast revised down.

With disinflation and steady growth, the likelihood of a hard landing has receded, and risks to global growth are broadly balanced. On the upside, faster disinflation could lead to further easing of financial conditions. Looser fiscal policy than necessary and than assumed in the projections could imply temporarily higher growth, but at the risk of a more costly adjustment later on. Stronger structural reform momentum could bolster productivity with positive cross-border spillovers. On the downside, new commodity price spikes from geopolitical shocks—including continued attacks in the Red Sea—and supply disruptions or more persistent underlying inflation could prolong tight monetary conditions. Deepening property sector woes in China or, elsewhere, a disruptive turn to tax hikes and spending cuts could also cause growth disappointments.

Forces shaping the outlook:

The global economic recovery from the COVID-19 pandemic, Russia’s invasion of Ukraine, and the cost-of-living crisis is proving surprisingly resilient. Inflation is falling faster than expected from its 2022 peak, with a smaller-than-expected toll on employment and activity, reflecting favorable supply side developments and tightening by central banks, which has kept inflation expectations anchored. At the same time, high interest rates aimed at fighting inflation and a withdrawal of fiscal support amid high debt are expected to weigh on growth in 2024.

Growth resilient in major economies. Economic growth is estimated to have been stronger than expected in the second half of 2023 in the United States, and several major emerging market and developing economies. In several cases, government and private spending contributed to the upswing, with real disposable income gains supporting consumption amid still-tight—though easing—labor markets and households drawing down on their accumulated pandemic-era savings. A supply-side expansion also took hold, with a broad-based increase in labor force participation, resolution of pandemic-era supply chain problems, and declining delivery times. The rising momentum was not felt everywhere, with notably subdued growth in the euro area, reflecting weak consumer sentiment, the lingering effects of high energy prices, and weakness in interest-rate-sensitive manufacturing and business investment. Low-income economies continue to experience large output losses compared with their prepandemic (2017–19) paths amid elevated borrowing costs.

Inflation subsiding faster than expected. Amid favorable global supply developments, inflation has been falling faster than expected, with recent monthly readings near the prepandemic average for both headline and underlying (core) inflation (Figure 1). Global headline inflation in the fourth quarter of 2023 is estimated to have been about 0.3 percentage point lower than predicted in the October 2023 WEO on a quarterover-quarter seasonally adjusted basis. Diminished inflation reflects the fading of relative price shocks— notably those to energy prices—and their associated pass-through to core inflation. ¹ The decline also reflects an easing in labor market tightness, with a decline in job vacancies, a modest rise in unemployment, and greater labor supply, in some cases associated with a strong inflow of immigrants. Wage growth has generally remained contained, with wage-price spirals—in which prices and wages accelerate together—not taking hold. Near-term inflation expectations have fallen in major economies, with long-term expectations remaining anchored.

Figure 1. Global Inflation: Rise and Fall
(Month-over-month annualized percent change, seasonally adjusted)

High borrowing costs cooling demand. To reduce inflation, major central banks raised policy interest rates to restrictive levels in 2023, resulting in high mortgage costs, challenges for firms refinancing their debt, tighter credit availability, and weaker business and residential investment. Commercial real estate has been especially under pressure, with higher borrowing costs compounding postpandemic structural changes. But with inflation easing, market expectations that future policy rates will decline have contributed to a reduction in longer-term interest rates and rising equity markets (Box 1). Still, long-term borrowing costs remain high in both advanced and emerging market and developing economies, partly because government debt has been rising. In addition, central banks' policy rate decisions are becoming increasingly asynchronous. In some countries with falling inflation—including Brazil and Chile, where central banks tightened policy earlier than in other countries—interest rates have been declining since the second half of 2023. In China, where inflation has been near zero, the central bank has eased monetary policy. The Bank of Japan has kept short-term interest rates near zero.

Fiscal policy amplifying economic divergences. Governments in advanced economies eased fiscal policy in 2023. The United States, where GDP had already exceeded its prepandemic path, eased policy more than did euro area and other economies in which the recovery was incomplete. In emerging market and developing economies, in which output has on average fallen even further below the prepandemic trend, on average the fiscal stance is estimated to have been neutral. The exceptions include Brazil and Russia, where fiscal policy eased in 2023. In low-income countries, liquidity squeezes and the elevated cost of interest payments—averaging 13 percent of general government revenues, about double the level 15 years ago—crowded out necessary investments, hampering the recovery of large output losses compared with prepandemic trends. In 2024, the fiscal policy stance is expected to tighten in several advanced and emerging market and developing economies to rebuild budgetary room for maneuver and curb the rising path of debt, and this shift is expected to slow growth in the near term.

INDIAN ECONOMIC OUTLOOK

Introduction:

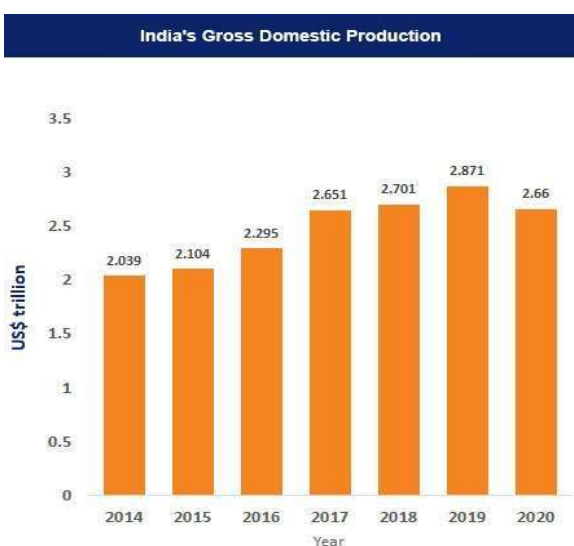

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP

in the first half of FY24. During the period January-March 2024, India's exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships. India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size:

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. - In March 2024, the gross Goods and Services Tax (GST) stood at second highest monthly revenue collection at Rs.1.78 lakh crore (US\$ 21.35 billion), of which CGST is Rs. 34,532 crore (US\$ 4.14 billion), SGST is Rs. 43,746 crore (US\$ 5.25 billion).
- Between April 2000–December 2023, cumulative FDI equity inflows to India stood at US\$ 971.52 billion.
- In February 2024, the overall IIP (Index of Industrial Production) stood at 147.2. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 139.6, 144.5 and 187.1, respectively, in February 2024.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 5.69% in December 2023.
- Foreign Institutional Investors (FII) inflows between April-July (2023-24) were close to Rs. 80,500 crore (US\$ 9.67 billion), while Domestic Institutional Investors (DII) sold Rs. 4,500 crore (US\$ 540.56 million) in the same period. As per depository data, Foreign Portfolio Investors (FPIs) invested (US\$ 8.06 billion) in India during January-April 2024.

The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. - In August 2021, Prime Minister Mr. Narendra Modi announced an initiative to start a national mission to reach the US\$ 400 billion merchandise export target by FY22.
- In August 2021, Prime Minister Mr. Narendra Modi launched a digital payment solution, e-RUPI, a contactless and cashless instrument for digital payments.
- In April 2021, Dr. Ahmed Abdul Rahman AlBanna, Ambassador of the UAE to India and Founding Patron of IFIICC, stated that trilateral trade between India, the UAE and Israel is expected to reach US\$ 110 billion by 2030.

- India is expected to attract investment of around US\$ 100 billion in developing the oil and gas infrastructure during 2019-23.
- The Government of India is expected to increase public health spending to 2.5% of the GDP by 2025.

Road Ahead:

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Note: Conversion rate used for January 2024 is Rs.1 = US\$ 0.012

INDIAN AGRICULTURE GROWTH

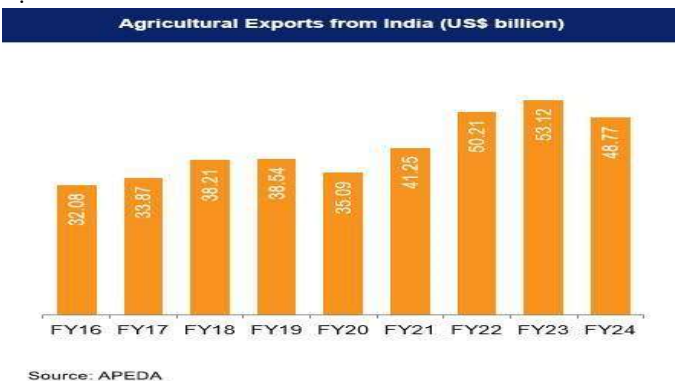

India is one of the major players in the agriculture sector worldwide and it is the primary source of livelihood for ~55% of India's population. India has the world's largest cattle herd (buffaloes), the largest area planted for wheat, rice, and cotton, and is the largest producer of milk, pulses, and spices in the world. It is the second-largest producer of fruit, vegetables, tea, farmed fish, cotton, sugarcane, wheat, rice, cotton, and sugar. The agriculture sector in India holds the record for second-largest agricultural land in the world generating employment for about half of the country's population. Thus, farmers become an integral part of the sector to provide us with a means of sustenance. Consumer spending in India will return to growth in 2021 post the pandemic-led contraction, expanding by as much as 6.6%. The Indian food industry is poised for huge growth, increasing its contribution to world food trade every year due to its immense potential for value addition, particularly within the food processing industry.

The Indian food processing industry accounts for 32% of the country's total food market, one of the largest industries in India and is ranked fifth in terms of production, consumption, export and expected growth. Foodgrain production in India touched 330.5 million metric tonnes (MT) in 2022-23 (3rd Advance Estimate). India is the world's 2nd largest producer of food grains, fruits and vegetables and the 2nd largest exporter of sugar. A total of 521.27 LMT rice has been anticipated for procurement for the upcoming KMS 2023-24, up from 496 LMT produced during the previous KMS 2022-23.

Market Trends:

According to Inc42, the Indian agricultural sector is predicted to increase to US\$ 24 billion by 2025. Indian food and grocery market is the world's sixth largest, with retail contributing 70% of the sales. As per the First Advance Estimates for 2023-24

(Kharif only), total foodgrain production in the country is estimated at 148.5 million tonnes. Rabi crop area has from 709.09 lakh hectares in 2022-23 to 709.29 lakh hectares in 2022-23. In 2022-23 (as per the second advance estimate), India's horticulture output is expected to have hit a record 351.92 million tonnes (MT), an increase of about 4.74 million tonnes (1.37%) as compared to the year 2021-22. The Agriculture and Allied industry sector witnessed some major developments, investments, and support from the Government in the recent past. Between April 2000-March 2024, FDI in agriculture services stood at US\$ 3.08 billion. According to the Department for Promotion of Industry and Internal Trade (DPIIT), the Indian food processing industry has cumulatively attracted a Foreign Direct Investment (FDI) equity inflow of about US\$ 12.58 billion between April 2000-March 2024. This accounts for 1.85% of total FDI inflows received across industries.

Increasing demand for animal-based food is expected to drive market growth:

The market is expected to surge in the coming years, due to the rise in the demand for animal-based food, such as meat, chicken, and others in the country. According to the data given by the Department of Animal Husbandry and Dairying, there were over 9.06 million pigs in the country, and around 851.81 million poultry in 2019, with a significant increase from the last census in 2012. The country had over 1.3 billion people, and even a tiny per capita per consumption has the potential to surge the demand for animal feed in the country.

According to the data given by the Indian Council of Food and Agriculture, the country's per capita consumption of poultry meat has been around 3.1 kg per annum. The country's per capita consumption of meat has been around 5.6 kg, per annum. Moreover, according to the trends given by the Food and Agriculture Organization, the demand for poultry meat is expected to increase by 850% by the year 2040, from around 1.05 million tonnes to 9.92 million tonnes, per annum. The rise in meat and chicken consumption is expected to increase the demand for high-quality animal feed products.

India Compound Feed Market Analysis:

The India Compound Feed Market size is estimated at USD 27.23 billion in 2024, and is expected to reach USD 36.60 billion by 2029, growing at a CAGR of 6.10% during the forecast period (2024-2029).

- The increased purchasing power of the populace, as well as favorable demographics in the country, from rural to urban areas, are also contributing largely to the compound feed market in the country. People are eating more animal products, such as dairy products, meat, fish, and eggs, as their disposable budgets rise in cities, necessitating more high-quality feed. This is a significant component that is fueling expansion in the compound feed industry.
- In 2021, the Department of Animal Husbandry and Dairy, Government of India, employed production agendas to guarantee food security and economic development, along with improving animal health. Improving the livestock sector's entrepreneurial development envisages supporting animal husbandry infrastructure and implementing the One Health framework. The aim of improving animal health is anticipated to support the growth of the compound feed market in the country.
- The poultry segment dominates the market due to growing meat consumption, which leads to a higher demand for poultry feed. Cargill Inc., Archer Daniels Midland, Charoen Pokphand, Godrej Agrovet Limited, Nutreco NV, Trouw Nutrition, and Alltech Inc. are some of the leading players in the market.

India Compound Feed Market Trends:

This section covers the major market trends shaping the India Compound Feed Market according to our research experts:

Rising Consumption of Agriculture:

Economic Survey says that the Indian agriculture sector provides livelihood support to about 42.3 per cent of the population and has a share of 18.2 per cent in the country's GDP at current prices. The sector has been buoyant, which is evident from the fact that it has registered an average annual growth rate of 4.18 per cent at constant prices over the last five years and as per provisional estimates for 2023-24, the growth rate of the agriculture sector stood at 1.4 percent. Economic Survey states that the Investment in agriculture research and support of enabling policies have contributed substantially to food security. It is estimated that for every rupee invested in agricultural research (including education), there is a payoff of ₹13.85. In 2022-23, ₹19.65 Thousand Crore was spent on agriculture research. Economic Survey calls for enhancing private sector investment in agriculture saying it is vital to provide impetus to the agriculture sector. Investment in technology, production methods, marketing infrastructure, and reduction in post-harvest losses need to be scaled up. A greater focus on post-harvest infrastructure and the development of the food processing sector can reduce wastage/loss and increase the length of storage, ensuring better prices for the farmers.

Economic Survey says that in 2022-23, foodgrain production hit an all-time high of 329.7 million tonnes, and oilseeds production reached 41.4 million tonnes. In 2023-24, food grain production is slightly lower at 328.8 million tonnes, primarily because of poor and delayed monsoons. The domestic availability of edible oil has risen from 86.30 lakh tonnes in 2015-16 to 121.33 lakh tonnes in 2023-24. The total area coverage of all oilseeds has increased from 25.60 million hectares in 2014-15 to 30.08 million hectares in 2023-24 (17.5 percent growth). This has reduced the percentage share of imported edible oil, from 63.2 per cent in 2015-16 to 57.3 percent in 2022-23, despite rising domestic demand and consumption patterns. Economic Survey suggests that to promote efficiency in agriculture marketing, and improve price discovery, the government implemented the e-NAM Scheme and as of 14th March 2024, more than 1.77 Crore farmers and 2.56 Lakh traders have been registered on the e-NAM portal. The Government of India launched the scheme to form and promote 10,000 FPOs in 2020 with a budget outlay of ₹6.86 thousand crore till 2027-28. As of 29 February 2024, 8,195 FPOs have registered under the new FPO scheme, and equity grants of ₹157.4 crore were released to 3,325 FPOs. Credit guarantee cover worth ₹278.2 crore was issued to 1,185 FPOs. Economic Survey states that the Agricultural price support assures farmers of remunerative returns, increasing income and allows the Government to ensure a stable supply of staples at reasonable prices. Accordingly, the Government has been increasing the MSP for all Kharif, Rabi and other commercial crops with a margin of at least 50 per cent over the all-India weighted average cost of production since the agricultural year 2018-19. Economic Survey shows that to provide social security to the most vulnerable farmer families, the Government implements Pradhan Mantri Kisan Maandhan Yojna (PMKMY). The scheme offers a monthly pension of ₹3,000 to the enrolled farmers on the attainment of 60 years of age, based on a nominal premium between ₹55 to ₹200 per month paid by the applicant (in the age group 18 to 40 years) subject to exclusion criteria. As of 07 July 2024, 23.41 lakh farmers have enrolled under the scheme. Economic Survey, on focusing to reduce the use of chemical fertilizer, states that the PM Programme for Restoration, Awareness Generation, Nourishment, and amelioration of Mother Earth (PM-PRANAM) initiative incentivises states to reduce chemical fertiliser use. It promotes sustainable methods such as the use of alternative fertilisers, viz. Nano Urea, Nano DAP, and organic fertiliser. Focusing on the security of farmers' crop, Economic Survey highlighted the Pradhan Mantri Fasal Bima Yojana (PMFBY) which offer a safety net against crop losses due to natural calamities, pests, or diseases, ensuring financial stability for farmers. The scheme safeguards farmers' livelihoods and encourage them to adopt modern farming practices and technologies. PMFBY is the largest crop insurance scheme in the world in terms of farmer enrolment and is the third largest scheme in terms of insurance premiums. The scheme ensure comprehensive risk cover for crops to farmers against all non-preventable natural risks from pre-sowing to post-harvest. The overall insured area in 2023-24 reached 610 lakh ha compared to 500.2 lakh ha in 2022-23. A total of 5549.40 Lakh farmer applications were insured under the scheme since 2016-17, and ₹150589.10 Crore has been paid as claims.

APPLICABLE LAWS AND REGULATIONS

I. BUSINESS/ TRADE RELATED LAWS/ REGULATIONS

- **Food Safety and Standards Act, 2006**

The Food Safety and Standards Act, 2006 is a comprehensive legislation that consolidates various laws related to food safety and establishes the Food Safety and Standards Authority of India (FSSAI) to regulate the food industry. The Act aims to ensure the availability of safe and wholesome food for human consumption by laying down science-based standards for articles of food and regulating their manufacture, storage, distribution, sale, and import. While FSSAI primarily oversees food safety for human consumption, it also sets standards and regulations for animal feed to ensure the overall safety and quality of food products derived from animals, such as milk, meat, and eggs. The rationale is that the quality of animal feed directly impacts the safety of the food products consumed by humans. FSSAI has established specific standards for various types of animal feed, including cattle feed, to ensure they are free from contaminants and of high nutritional value. Manufacturers of animal feed, including cattle feed, must obtain the necessary licenses and registrations from FSSAI. This helps in maintaining a controlled and monitored supply chain. There are stringent labeling requirements for animal feed products. Labels must provide detailed information about the ingredients, nutritional content, and usage instructions to ensure transparency and safety. FSSAI mandates adherence to Good Manufacturing Practices for animal feed manufacturers to ensure the production process is hygienic and meets safety standards. Regular inspections and audits are conducted by FSSAI to ensure compliance with the established standards and regulations. Non-compliance can lead to penalties or suspension of licenses. The regulations emphasize rigorous quality control measures, including testing for contaminants like aflatoxins, heavy metals, pesticides, and other harmful substances. FSSAI regulations play a crucial role in the cattle feed industry by ensuring the feed is safe, nutritious, and free from harmful substances, ultimately contributing to the safety of animal-derived food products for human consumption.

- **Prevention of Food Adulteration Act, 1954**

The Prevention of Food Adulteration Act, 1954 is a significant legislation in India aimed at preventing the adulteration of food items to ensure the safety and quality of food consumed by the public. Enacted on September 29, 1954, this Act defines adulteration and outlines various scenarios where an article of food can be deemed adulterated. It covers instances where food sold does not meet the standards expected by the consumer, contains harmful substances, is processed under unhygienic conditions, or includes elements unfit for human consumption like diseased animal parts or poisonous ingredients. The Act extends to the entire country and has been pivotal in setting standards to combat food adulteration, ensuring that food products meet specified quality and purity criteria. The Act has evolved over time through amendments in 1964, 1976,

and 1986, reflecting the ongoing efforts to enhance food safety regulations in India.

The Prevention of Food Adulteration Act, 1954, primarily addresses the adulteration of food meant for human consumption. However, the principles of this act can indirectly apply to the cattle feed industry because the quality of cattle feed directly impacts the safety and quality of animal-derived food products consumed by humans. Ensuring the cattle feed is free from adulterants and contaminants is essential for the health of the animals and the safety of the food products they produce. Therefore, while the act may not directly govern cattle feed, its objectives support the regulation of feed quality to prevent food adulteration at the source.

- **Bureau of Indian Standards**

The Bureau of Indian Standards (BIS) extends its applicability to the food color industry in India, where it plays a crucial role in ensuring quality and safety standards. BIS develops Indian Standards for various products, including food colors, making certification from BIS mandatory for certain food colors to be sold in the country. Manufacturers, both domestic and foreign, are required to obtain a BIS license to use the ISI mark on their food color products, with the certification process involving adherence to relevant Indian Standards, license application, and scrutiny through audits and sample testing by BIS before approval is granted. Selling food colors without the ISI mark is deemed illegal and can result in criminal charges, imprisonment, and fines, while imported food colors lacking a BIS license will face customs restrictions from July 1, 2023. This stringent certification framework ensures that food colors in the market meet specified quality and safety criteria, aligning with BIS's overarching objective of safeguarding consumer health and promoting product excellence in the food industry.

- **The Legal Metrology Act 2009**

The Legal Metrology Act, 2009 ("LMA") provides for establishing uniform standards of weights and measures regulate trade in weights, and other goods which are sold or distributed by weight, measure or number. Every manufacturer, repairer and seller shall have to obtain a license from the respective 148 Controller. The Act allows Govt. approved test centers to verify weights and measures.

- **The Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH)**

The Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH) Regulation is a European Union regulation that addresses the production and use of chemical substances and their potential impacts on human health and the environment. The main goals of REACH are to improve the protection of human health and the environment from the risks posed by chemicals, while enhancing the competitiveness of the EU chemicals industry. Key aspects of REACH include registration, where companies must register chemical substances manufactured or imported into the EU in quantities exceeding 1 metric ton per year, and registrations are submitted to the European Chemicals Agency (ECHA) through the IUCLID website. Evaluation involves ECHA evaluating individual registrations for compliance, and EU Member States evaluating selected substances to clarify initial concerns for human health or the environment. Authorization allows substances of very high concern to be subject to authorization to ensure risks are adequately controlled or justified by socio-economic grounds, and by March 2019, authorizations had been granted 185 times, with no eligible request ever having been rejected. Restriction enables authorities to restrict the use of hazardous substances if their risks are unmanageable, and restrictions can be introduced across the European Community where shown to be necessary. REACH places the burden of proof on companies to identify and manage risks linked to the substances they manufacture and market in the EU, and it impacts a wide range of companies across many sectors, even those not directly involved with chemicals.

- **The Customs Act, 1962**

The Customs Act, 1962 is an Act of the Parliament of India that consolidates and amends the law relating to customs. It was enacted on December 13, 1962, and came into force on February 1, 1963. The Act is administered by the Ministry of Finance, Department of Revenue, and is responsible for regulating the import and export of goods into and out of India. Key provisions include the power of customs officers to search and inspect persons and places, summon witnesses, and require the production of documents, as well as the disposal of seized goods. The Act has undergone several amendments, including making offenses under the Act bailable in 2012 and substituting the term "Principal Commissioner of Customs" for "Commissioner of Customs" in several sections in 2014.

- **The Gujarat Cotton Seeds (Regulation of Supply, Distribution, Sale and Fixation of Sale Price) Act, 2008**

The Gujarat Cotton Seeds (Regulation of Supply, Distribution, Sale and Fixation of Sale Price) Act, 2008, is a state-specific law enacted to regulate the supply, distribution, sale, and fixation of sale prices of cotton seeds in the state of Gujarat. The Act defines various terms, appoints a Cotton Seeds Controller to regulate the supply, distribution, and sale of cotton seeds, and empowers the Controller to issue orders, direct sales, and

ensure compliance with quality standards. It also requires vendors to obtain a license, establishes seeds testing laboratories, provides for compensation to farmers if seeds fail to meet expected agronomic performances, and appoints Seeds Inspectors and Seeds Analysts. The Act repeals the Gujarat Cotton Seeds (Regulation of Supply, Distribution, Sale and Fixation of Sale Price) Ordinance, 2008, and ensures the quality and authenticity of cotton seeds sold to farmers, thereby protecting their interests. The Ikhedut Gujarat system is a portal that provides various services related to agriculture, including the issuance and renewal of licenses for fertilizers, seeds, and pesticides. This system is managed by the Gujarat government and aims to streamline the process of obtaining these licenses, making it more efficient and accessible for farmers and other stakeholders involved in the agricultural sector.

- ***The Gujarat Essential Commodities and Cattle (Control) Act, 2005***

The Gujarat Essential Commodities and Cattle (Control) Act, 2005, regulates the production, supply, and distribution of essential commodities, including cattle feed, in Gujarat to ensure availability, fair pricing, and quality. It mandates licensing for producers and sellers, prevents hoarding and black marketing, enforces quality control, and prescribes penalties for non-compliance, thereby supporting the agricultural sector and ensuring the safety of animal-derived food products.

- ***The Gujarat Fertilizer Control Order, 1985***

The Gujarat Fertilizer Control Order, 1985, is a regulation that governs the distribution and sale of fertilizers in the state of Gujarat. It requires all dealers, including manufacturers, pool handling agencies, wholesale dealers, retail dealers, and industrial dealers, to register with the registering authority and obtain a certificate of registration. The order specifies the standards and specifications for different types of fertilizers, lays down requirements for laboratory facilities in manufacturing units, and allows the Central Government to fix maximum prices for fertilizers. Dealers must display stock positions and price lists, issue cash or credit memoranda to purchasers, and comply with the order's provisions, which are enforced by registering authorities and inspectors who must possess specific qualifications.

INDEPENDENT AUDITOR'S REPORT

TO THE BOARD OF DIRECTORS OF EUREKA INDUSTRIES LIMITED

Report on the audit of the Standalone Financial Results

Opinion

We have audited the accompanying standalone quarterly financial results of EUREKA INDUSTRIES LIMITED (“the company”) for the quarter ended 31st March, 2024 and the year-to-date results for the period from 1st April, 2023 to 31st March, 2024, attached herewith, being submitted by the company pursuant to the requirement of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended (“The Listing Regulations”).

In our opinion and to the best of our information and according to the explanations given to us these standalone financial results:

- (i) are presented in accordance with the requirements of Regulation 33 of the Listing Regulations in this regard; and
- (ii) give a true and fair view in conformity with the recognition and measurement principles laid down in the Indian Accounting Standards (‘Ind AS’) as notified by the MCA under section 133 of the companies Act, 2013, read together with the rule 3 of the companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and other accounting principles generally accepted in India of the net loss and other comprehensive income and other financial information of the company for the quarter and year then ended.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013 (the Act). Our responsibilities under those Standards are further described in the Auditor’s Responsibilities for the Audit of the Standalone Financial Results section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the standalone financial results under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI’s Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion.

Management's Responsibilities for the Standalone Financial Results

These quarterly financial results as well as the year-to-date standalone financial results have been prepared on the basis of the interim financial statements. The Company's Board of Directors are responsible for the preparation of these financial results that give a true and fair view of the net loss and other comprehensive income and other financial information in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34, 'Interim Financial Reporting' prescribed under Section 133 of the Act read with relevant rules issued thereunder and other accounting principles generally accepted in India and in compliance with Regulation 33 of the Listing Regulations. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial results that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial results, the Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Results

Our objectives are to obtain reasonable assurance about whether the standalone financial results as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial results.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial results, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting

a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.
- Evaluate the appropriateness and reasonableness of disclosures made by the Board of Directors in terms of the requirements specified under Regulation 33 and Regulation 52 of Listing Regulations.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial results or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial results, including the disclosures, and whether the financial results represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the standalone financial results of the company to express an opinion on the standalone financial results.

Materiality is the magnitude of misstatements in the Standalone financial results that, individually or in aggregate, makes it probable that economic decisions of a reasonably knowledgeable users of the standalone financial results may be influenced. We consider Quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the Standalone Financial Results.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Other Matter

We are independent of the Company in accordance with the *Code of Ethics* issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the Standalone Financial Statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. As stated, these events or conditions, indicate that a material uncertainty exists that may cast significant doubt on the Company’s ability to continue as a going concern. This material fact is disclosed to the Those charge with Governance (TCWG), and they had appropriately disclosed the facts and disclosed the basis of there assumption to continue as a going concern, during the conduct of the audit and hence, our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the Standalone Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. Information other than the financial statements and Auditor’s Report Thereon

- The Company’s Board of Directors is responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the standalone financial statements and our auditor’s report thereon.
- Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.
- In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.
- If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those charged with governance for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance, including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the Standalone Financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Standalone Financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Standalone Financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The

risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls with reference to Standalone Financial statement in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Standalone Financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Standalone Financial statements, including the disclosures, and whether the Standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the Standalone Financial Statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the Standalone Financial Statements may be influenced.

We consider quantitative materiality and qualitative factors (i) in planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the Standalone Financial Statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Standalone Financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Emphasis Of Matter:

1. Refer to Notes forming part of statement, we came to across about the conditions of pricing policy of the company wherein sale orders are accepted prior to the any purchase order placed or prior to purchase cost determined which leads to loss to the company. we have identified the same and communicated to the top management of the company. and accordingly advised to the Those charge with Governance to create provision or restructure the company's pricing policy.
2. Refer to Notes forming part of statement which includes the balance of Trade Payables, Loans including deposits and advances are subject to confirmation from and reconciliation with the relevant parties as on the date of balance sheet date.

Our opinion is not modified with respect to above mentioned matter.

- i. In respect of the Company, the feature of recording audit trail (edit log) facility was not enabled at the database layer to log any direct data changes for all the accounting softwares used for maintaining the books of account.
- ii. In respect of the Company, in the absence of coverage of audit trail (edit log) with respect to database level in the independent auditor's report in relation to controls at the service organisation for accounting software used for preparation of financial statements, which is operated by third-party software service provider, we are unable to comment whether the audit trail feature of the database level of the said software was enabled and operated throughout the year for all relevant transactions recorded in the software. Further, where audit trail (edit log) facility was enabled and operated, we did not come across any instance of the audit trail feature being tampered with.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to Standalone Financial Statements and their operating effectiveness. Our audit of internal financial controls with reference to Standalone Financial Statements included obtaining an understanding of internal financial controls with reference to Standalone Financial Statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to Standalone Financial Statements.

A company's internal financial control with reference to Standalone Financial Statement is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. a) certain financial assets and liabilities (including derivative instruments)

(iii) Basis of Measurement

These financial statements prepared and presented under the historical cost convention with the exception of certain assets and liabilities that are required to be carried at fair value by Ind AS. The fair value is the price that would be received to sell an asset or paid to transfer liability in an orderly transaction between the market participant at the measurement date.

(iv) Revenue Recognition:

Revenue is recognized upon transfer of control of promised goods or services to customers in an amount that reflects the consideration the Company expects to receive in exchange for those goods or services.

Sale of goods: Revenue from the sale of products is recognized at the point in time when control is transferred to the customer. Revenue is measured based on the transaction price, which is the consideration, net of customer incentives, discounts, variable considerations, payments made to customers, other similar charges, as specified in the contract with the customer. Additionally, revenue excludes taxes collected from customers, which are subsequently remitted to governmental authorities.

The standalone financial statements are presented in Indian Rupee, the national currency of India, which is the functional currency of the Company.

(vii) Taxation:

Income tax expense represents the sum of the tax currently payable and deferred tax.

a) Current tax: Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 and other applicable tax laws.

b) Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognized as an asset in the Balance Sheet when it is highly probable that future economic benefit associated with it will flow to the Company.

c) Deferred tax: Deferred tax is recognized using the balance sheet approach. Deferred tax assets and liabilities are recognized on temporary differences between the carrying amounts of assets and liabilities in the standalone financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences.

Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be utilized.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

(viii) Employee Benefits: Short Term Employee Benefits Employee benefits payable wholly within twelve months of rendering the services are classified as short-term employee benefits and recognized in the period in which the employee renders the related service. These are re-recognized at the undiscounted amount of the benefits expected to be paid in exchange for that service.

(ix) Inventories:

Company has no inventory as on the balance sheet date.

(x) Provisions and contingencies:

Provisions: A provision is recognized when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of time value of money is material).

Contingent liabilities: Contingent liabilities are not recognized but are disclosed in notes to accounts.

(xi) Cash and cash equivalents: Cash comprises cash on hand and demand deposits with banks.

(xiv) In the opinion of the board of Directors, Current Assets, Loans and Advances a value of realization equivalent to the amount at which they are stated in the Balance Sheet. Adequate provisions have been made in the accounts for all the known liabilities.

(xv) Property, Plant and Equipment:

Property, plant and equipment are carried at cost less accumulated depreciation and impairment losses, if any. Depreciation on Property, plant and equipment (other than freehold land) has been provided on the Diminishing method as per the useful life prescribed in Schedule II to the Companies Act, 2013, in whose case the life of the assets has been assessed as under based on account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers warranties and maintenance support, etc.

The estimated useful life of the tangible assets and the useful life are reviewed at the end of each financial year and the depreciation period is revised to reflect the changed pattern, if any. An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in the statement of profit and loss.

(xvi) Investment & Financial Assets

(a) Classification

The Group classifies its financial assets in the measurement categories:

- * Those to be measured subsequently at fair value, and
- * Those measured at amortised cost.

The Classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will be recorded in profit or loss. For investment in equity instruments, this will depend on whether group has made an irrecoverable

election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income.

(b) Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized (i.e. removed from the Company's balance sheet) when:

A. The contractual rights to the cash flows from the financial asset have expired, or B. The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either

- i) The Company has transferred substantially all the risks and rewards of the asset, or
- ii) The Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognize the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

(c) Impairment of financial assets

The Company assesses impairment based on expected credit loss (ECL) model to the following:

A. Financial assets measured at amortized cost B. Financial assets measured at fair value through other comprehensive income

Expected credit losses are measured through a loss allowance at an amount equal to:

- A. The 12-months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date);
or
- B. Full time expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument)

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables. It recognizes impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition. The Company uses a provision matrix to determine impairment loss allowance for trade receivables. The provision matrix is based on its historically observed default rates over the expected life of the trade receivable and is adjusted for forward looking estimates. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analyzed.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-months ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the Company reverts to recognising impairment loss allowance based on 12-months ECL.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the statement of profit and loss. The balance sheet presentation for various financial instruments is described below:

- A. Financial assets measured as at amortised cost and contractual revenue receivables - ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the company does not reduce impairment allowance from the gross carrying amount.
- B. Financial assets measured at FVOCI - Since financial assets are already reflected at fair value, impairment allowance is not further reduced from its value. Rather, ECL amount is presented as accumulated impairment amount in the OCI.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

Financial Liabilities

a) Initial recognition and measurement

All financial liabilities are recognised initially at fair value and, in case of loans and borrowings and payables, net of directly attributable transaction costs.

Subsequently, all financial liabilities are measured at amortised cost or at fair value through profit or loss. The Company's financial liabilities include trade and other payables, loan and borrowings including bank overdrafts.

b) Subsequent measurement

A. Financial liabilities measured at amortised cost

B. Financial liabilities subsequently measured at fair value through profit or loss Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ losses are not subsequently transferred to profit or loss. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Company has not designated any financial liability as at fair value through profit or loss.

c) Derecognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

(xvii) Fair Value

The Company measures certain financial instruments at fair value at each balance sheet date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- A. In the principal market for the asset or liability, or
- B. In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as under, based on the lowest level input that is significant to the fair value measurement as a whole:

- A. Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- B. Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- C. Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

This note summarizes the accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

MANAGEMENT DISCUSSION & ANALYSIS REPORT:

GLOBAL ECONOMY OVERVIEW:

According to the World Economic Situation and Prospects as of mid-2024, the world economy is now projected to grow by 2.7 per cent in 2024 (+0.3 percentage points from the January forecast) and 2.8 per cent in 2025 (+0.1 percentage points from the January forecast). On balance, the near-term economic outlook is only cautiously optimistic as economic vulnerabilities remain, amid persistently high interest rates, continuing geopolitical tensions, and increasing climate risks.

Unmet revenue expectations have ushered in a new wave of pragmatism where maintaining a healthy profit margin has become pivotal for corporations due to the uncertain macro outlook. In extreme cases, organizations resorted to cost-cutting measures, such as reducing headcount and cutting discretionary spending. The global real estate sector's outlook for the financial year 2023-24 reflects a mix of opportunities and challenges influenced by economic, demographic, and technological trends. Continued urbanization, especially in emerging markets, drives demand for residential and commercial properties. Post-pandemic economic recovery boosts investor confidence and increases real estate transactions.

INDIAN ECONOMY OVERVIEW:

India has bounced back strongly since the pandemic and it is now one of the world's fastest-growing economies. Its GDP growth for the July to-September quarter shattered market expectations, growing 7.6% year over year. The biggest boost to growth came from a rebound in the industrial sector—auto sales, industrial production, and corporate profits pointed to resilient performance. Double-digit growth in the industry suggests that businesses ramped up production to meet the oncoming demand during festivals. In addition, credit growth and flights taken pointed to buoyancy in the services sector. Indeed, the financial, professional, and real estate services sectors did quite well in the first half of the fiscal year as well.

In the year ahead, improving fundamentals should buttress the underlying strength of GDP growth. We expect the Indian economy to grow between 6.9% and 7.2% through fiscal 2023 to 2024 (April 2023 to March 2024) in our baseline scenario, followed by growth ranging between 6.4% and 6.7% the next fiscal year. Higher government spending on building infrastructure and improving logistics will help reduce the cost of doing business and encourage private investment. The fiscal deficit of the first seven months was just 45% of the budget estimate, which gives the government ample room to focus on infrastructure spending and to support jobs and income.

Bringing more manufacturing opportunities to India, increasing digital adoption across all sectors of the economy, and promoting competitiveness through exports will be important for a sustainable growth trajectory in the long term. India will have to leverage its proximity to a sizable domestic market to increase the scale and scope of economies where it has a competitive advantage. To secure inclusive and widespread growth, it will be necessary to capitalize on the growing environment for trade and investment opportunities by stepping up technological transformation, strengthening governance, and working toward attaining decarbonization targets for sustainability.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy upto any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion)(“DPIIT”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated

June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 ("**FDI Circular 2020**"), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 will prevail. The payment of inward remittance and reporting requirements are stipulated under the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 issued by RBI. The FDI Circular 2020, issued by the DPIIT, consolidates the policy framework in place as on October 15, 2020, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectorial limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

No investment under the FDI route (i.e. any investment which would result in the investor holding 10% or more of the fully diluted paid-up equity share capital of the Company or any FDI investment for which an approval from the government was taken in the past) will be allowed in the Issue unless such application is accompanied with necessary approval or covered under a pre-existing approval from the government.
